

MARTEDÌ DELLA CLINICA NEUROLOGICA

ENCEFALITI AUTOIMMUNI: DAL LABORATORIO ALLA CLINICA

29.03.2022

Matteo Gastaldi

IRCCS Fondazione Mondino, Pavia
AULA MAGNA - Palazzina di Neuroscienze

Ore 16.00 – 17.00 casi clinici
Ore 17.30 – 18.30 seminario

Partecipazione in presenza – prenotazione su: <https://rebrand.ly/mart-clinica>
Partecipazione online – <https://unipd.zoom.us/j/82802888291>

Matteo Gastaldi was trained in neurology at the University of Pavia and Hospital Macchi foundation (Varese) and acquired his PhD at the University of Pavia under the supervision of his mentor Dr. Diego Franciotta. In this period, he spent 18 months at the John Radcliffe Hospital neuroimmunology laboratory (University of Oxford) under the supervision of Prof. Angela Vincent, where he developed a keen interest in the field of antibody mediated disorders of the central nervous system. He spent 3 months at the IDIBAPS Barcellona neuroimmunology (Prof. Francesc Graus and Josep Dalmau), a leading laboratory for the detection of neuronal surface antibodies.

Since 2020 he is the head of the Neuroimmunology laboratory and Neuroimmunology research Unit at the IRCCS Mondino Foundation, a referral laboratory for the detection of neuroglial antibodies in Italy.

He is currently part of the board of the Italian Association of Neuroimmunology, where he coordinates a research group for the study of autoimmune neurology (NINA) that promotes network projects in this field.

He is coordinating one of the Working groups for the European Academy of Neurology (EAN) for the therapeutic guidelines for Autoimmune Encephalitis.
