

# MARTEDÌ DELLA CLINICA NEUROLOGICA

## New frontiers for mitochondrial medicine

**09.04.2024**

**Prof. Patrick Chinnery**

**AULA MAGNA - Palazzina di Neuroscienze**  
Ore 17.30 – 18.30 seminario

<https://unipd.zoom.us/j/88959319767>

**Patrick Chinnery** is Professor of Neurology at the University of Cambridge and an Honorary Consultant Neurologist at Addenbrooke's Hospital.

He runs a combined clinical and laboratory research programme based in the MRC Mitochondrial Biology Unit and has been supported by Wellcome since 1995, most recently through a Principal Research Fellowship. He is known for his expertise in rare inherited diseases that affect the nervous system. His lab has been studying the genetic basis of mitochondrial disorders for over two decades, harnessing the power of whole genome sequencing and developing new treatments through experimental medicine and early phase trials.

He jointly chairs the NIHR BioResource for Translational Research in Common and Rare diseases, and in October 2023 was appointed Executive Chair of the UK Medical Research Council and is the life sciences champion for UK Research and Innovation.
